DIATRON REAGENTS

Diatron's systems consist of two perfectly matched elements: analyzers and reagents. The optimum performance is only achieved when genuine reagents are used. Diatron's ISO 13485 certified reagent manufacturing plant is designed to ensure the highest quality standards. All lots of reagents are fully validated prior to release on each of our associated instruments for low background counts, osmolality, pH and other critical parameters. Our diluent reagents contain no azide and our lyse reagents are cyanide free. The highly stable reagents offer a shelf life of up to 48 months from the date of manufacture and up to 120 days of on-board stability. The combination of Diatron reagents and Diatron analyzers together ensure the best system performance and quality of results.
